Certificate of Blockchain Proof

Brimbank General Guidelines Final.PDF

Michael Harrison (google user: mike@southbanksoftware.com)

This certificate constitutes proof that a document has been anchored to the bitcoin blockchain, thereby proving that the document existed in its current form on the date at which the blockchain entry was created.

You can use this proof to attest that:

(a) the document has not been altered in any way.
(b) the document existed in its current from on the specified date.

An online version of this proof can be found at:

https://provendocs.com/proof/5c2e8efbcf337b5f17e1bf9e

The document was uploaded by Michael Harrison (google user: mike@southbanksoftware.com) at 2019-01-03T22:38:51.224Z

Details of the document being proved

The document name when hashed was "Brimbank General Guidelines Final.PDF"

You can view a copy of this document at: https://provendocs.com/document/5c2e8efbcf337b5f17e1bf9e (permissions may be required to view the document)

The cryptographic hash of the document is:
fa502d19948e31dc924b977c67d9472042ed885c5bc81a4e74ff3daf92831d56

See Schedule 1 for details of the hashing algorithm employed.

Blockchain proof details

The document hash was included within the chainpointproof at undefined

See Schedule 2 for a detailed cryptographic proof.

The Chainpoint proof was anchored to the bitcoin blockchain at block undefined in bitcoin transaction undefined at UTC: Fri Jan 04 2019 09:38:52 GMT+1100 (Australian Eastern Daylight Time)

Summary

The document Brimbank General Guidelines Final.PDF with hash value fa502d19948e31dc924b977c67d9472042ed885c5bc81a4e74ff3daf92831d56 was anchored to the bitcoin blockchain
by Michael Harrison (google user: mike@southbanksoftware.com) at UTC: 2019-01-03T22:38:51.224Z. Providing that the document
continues to hash to that value, you can be certain that the document existed in its current form on or before that date.

Schedule 1: Document hashing

The document hash of fa502d19948e31dc924b977c67d9472042ed885c5bc81a4e74ff3daf92831d56 was obtained by performing a SHA-2 256 bit hash on the document at https://provendocs/documents/5c2e8efbcf337b5f17e1bf9e (permission may be required to view this document). The hash was calculated on the document and its metadata as stored in the ProvenDocs system.

You can download a copy of the document and its metadata (permissions reuqired) at https://provendocs/documents/5c2e8efbcf337b5f17e1bf9e/download.You can independently validate the hash by using the
open source hash validation tool at https://provendocs.com/downloads/validateHash.You can also extract the document from its metadata using this tool.

Schedule 2: Chainpoint proof

Chainpoint is an open standard for linking data to the public blockchain. It aggregates multiple hash values into a single
hash value which is then placed on the blockchain. The following chainpoint proof proves that the hash value of fa502d19948e31dc924b977c67d9472042ed885c5bc81a4e74ff3daf92831d56 is associated with the chainpoint proof placed on the bitcoin blockchain in transaction undefined

This proof can be downloaded from https://provendocs.com/proofs/undefined

Below is a binary representation of the chainproof
