

Certificate of Blockchain Proof

blue.png_email_2019-01-02T02:50:07.344Z.png

Michael Harrison (google user: mike@southbanksoftware.com)

This certificate constitutes proof that a document has been anchored to the bitcoin blockchain, thereby proving that the document existed in its current form on the date at which the blockchain entry was created.

You can use this proof to attest that:

(a) the document has not been altered in any way.(b) the document existed in its current from on the specified date.

An online version of this proof can be found at: https://provendocs.com/proof/5c2c26df3a1956424003af03

The document was uploaded by Michael Harrison (google user: mike@southbanksoftware.com) at 2019-01-02T02:50:07.344Z

Details of the document being proved

The document name when hashed was "blue.png_email_2019-01-02T02:50:07.344Z.png"

You can view a copy of this document at: https://provendocs.com/document/5c2c26df3a1956424003af03 (permissions may be required to view the document)

The cryptographic hash of the document is: f2bc62286bf899cf64c119ff929428ade2beafb2df12c642c7fa7f1c3a098531

See Schedule 1 for details of the hashing algorithm employed.

Blockchain proof details

The document hash was included within the <u>chainpointproof at</u> https://a.chainpoint.org/calendar/2474350/data

See Schedule 2 for a detailed cryptographic proof.

The Chainpoint proof was anchored to the bitcoin blockchain at block <u>556627</u> in bitcoin transaction a1f78768155301695ef89b53d4198d8b861e9b177fea43233c0ba53aa853817e at UTC: <u>Wed Jan 02 2019 13:50:08</u> GMT+1100 (Australian Eastern Daylight Time)

Summary

The document <u>blue.png_email_2019-01-02T02:50:07.344Z.png</u> with hash value <u>f2bc62286bf899cf64c119ff929428ade2beafb2df12c642c7fa7f1c3a098531</u> was anchored to the bitcoin blockchain by Michael Harrison (google user: <u>mike@southbanksoftware.com</u>) at UTC: <u>2019-01-02T02:50:07.344Z</u>. Providing that the document

continues to hash to that value, you can be certain that the document existed in its current form on or before that date.

Schedule 1: Document hashing

The document hash of f2bc62286bf899cf64c119ff929428ade2beafb2df12c642c7fa7f1c3a098531 was obtained by performing a SHA-2.256 bit hash on the document at https://provendocs/documents/5c2c26df3a1956424003af03 (permission may be required to view this document). The hash was calculated on the document and its metadata as stored in the ProvenDocs system.

You can download a copy of the document and its metadata (permissions reuqired) at https://provendocs/documents/5c2c26df3a1956424003af03/download. You can independently validate the hash by using the

open source hash validation tool at https://provendocs.com/downloads/validateHash. You can also extract the document from its metadata using this tool.

Schedule 2: Chainpoint proof

Chainpoint is an open standard for linking data to the public blockchain. It aggregates multiple hash values into a single

hash value which is then placed on the blockchain. The following chainpoint proof proves that the hash value of f2bc62286bf899cf64c119ff929428ade2beafb2df12c642c7fa7f1c3a098531 is associated with the chainpoint proof placed on the bitcoin blockchain in transaction a1f78768155301695ef89b53d4198d8b861e9b177fea43233c0ba53aa853817e

This proof can be downloaded from https://provendocs.com/proofs/undefined

Below is a binary representation of the chainproof
